EDUCATION

University of the Philippines Cebu

BS Computer Science - 1.55 GWA (Cum Laude Standing)

2022-2026

Cebu, Philippines

ACADEMIC RESEARCH

CEBIDN: A Computational Framework for Cebuano Idioms

2025 – Present

Undergraduate Thesis (Special Problem)

Cebu, Philippines

- Developing a localized NLP framework for the identification, disambiguation, and literal normalization of Cebuano idioms to advance regional language modeling and AI translation accuracy.

COURSEWORK / SKILLS

Languages & Frameworks: Python, TypeScript/JavaScript, Next.js, React, Tailwind CSS

Architecture & Design: SQL & Database Design, RESTful APIs, System Architecture, Data Structures & Algorithms

Tools & Cloud: GenAI Integration & Prompting, Cloud Deployment (Vercel, Railway)

PROJECTS

Inspectify [🔗](#) | Expo, Python, Flask, MySQL, Gemini (Spatial Understanding), Railway

2024-2025

- A mobile app that allows users to take or upload photos of their home to receive an assessment highlighting the damaged areas with suggested maintenance tips, powered by Gemini's spatial understanding. It also features a disaster risk awareness tool and displays maps of nearby repair shops.
- Role:** Full Stack | [GitHub Repository](#)

CHR Case Management & Monitoring System [🔗](#) | Next.js, Tailwind CSS, Supabase, Vercel

2025

- Designed and built a full case-management platform for the Commission on Human Rights Region VII, coordinating requirements with stakeholders and translating operational needs into a 6-role workflow system with granular access control.
- Role:** Full Stack | [Live Site](#)

MBTI Personality Type Classification [🔗](#) | Next.js, Python, Scikit-learn, XGBoost, NLTK

2025-2026

- Developed a full web interface for a custom MBTI test and trained four machine learning models (XGBoost, Random Forest, Logistic Regression, and LDA) to predict personality types, comparing their predictive accuracy and visualizing the results.
- Role:** Full Stack & Researcher | [GitHub Repository](#) | [Live Site](#)

Compile Studio [🔗](#) | MIPS Assembly, Python, Tkinter, Mars.jar

2024

- A desktop IDE running a custom-designed programming language called 'Brainrot' with its own compiler, and an AI coding assistant you can talk to by speech or text. Built entirely from scratch.
- Role:** Full Stack & Project Manager | [GitHub Repository](#)

EXPERIENCE & EXTRACURRICULAR

Lexmark-Xerox Global Services Support

2025

Asset Management Intern

Cebu, Philippines

- Processed and managed large-scale enterprise asset datasets within the Lexmark-Xerox global services infrastructure, collaborating across teams to ensure operational data integrity.

Team Kawayanan (CEB-I Hacks)

2025

Hackathon

Cebu, Philippines

- Top 25 finalist out of 87 teams (400+ students) at MCIA's regional AI hackathon by rapidly prototyping a tourism tech solution and authoring a technical paper under strict time constraints.
